

# BELLAMBI HEIGHTS BATTERY ENERGY STORAGE SYSTEM

**Project Update March 2026**

## CONSTRUCTION WORKS

### Works underway this month

Construction on site is progressing steadily this month across several key work streams.

#### Cut and fill earthworks

- Bulk earthworks are ongoing across the site to shape the ground and establish final levels for construction. This includes levelling work areas, preparing foundations and improving drainage ahead of the next construction stages.

#### Internal road extension

- Works will continue on extending the internal access road. Once complete, this upgraded road network will support construction traffic, improve access for heavy vehicles, and streamline delivery routes for major equipment and materials.

#### Engineering design finalisation

- The project team will continue finalising engineering design packages. This includes detailed civil, electrical, and structural designs, ensuring all elements are coordinated and ready for construction and installation phases later in the year.

#### Procurement and deliveries

- Procurement of major equipment and construction materials is on track. Deliveries will be scheduled throughout the month to keep pace with construction and minimise impacts on local roads.

# ENGAGEMENT ACTIVITIES

## Community Information Session

Wednesday 14 January 2026  
Robertsons Park, Mudgee

Vena Energy, together with our project partners, hosted a full-day community information session at Robertsons Park. The event provided an opportunity for local residents, businesses and community groups to learn more about the project and speak directly with the team.

Visitors came along to:

- Meet the team and our project partners
- Hear directly about the project
- Ask questions or share feedback
- Register for employment or procurement opportunities

### Community Feedback

We had valuable discussions with local residents, businesses, council representatives and education groups. The response was positive, with many attendees appreciating the chance to speak face-to-face and gain a better understanding of the project.

## FEEDBACK

Vena Energy is committed to delivering world-class green energy solutions that better serve the interests of our stakeholders.

We invite you to get in touch if you have feedback or want to know more about the project.

Submit your feedback via the QR code or our website.
