

BELLAMBI HEIGHTS BATTERY ENERGY STORAGE SYSTEM

Project Update April 2026

CONSTRUCTION WORKS

Works underway this month

Construction activities will continue to progress during April, with the project transitioning into the next phase of on-site works. Key activities planned for the month include:

Next stage of civil works

- Civil construction will continue across the development, moving into the next stage following earlier earthworks. This includes further ground preparation, formation works, and enabling activities to support upcoming structural and installation works.

Internal road extension

- Works to extend the internal road network will remain underway. These upgrades are critical to improving site access and will support increased construction activity and the safe, efficient delivery of materials and equipment.

Engineering design finalisation

- The project team will continue finalising engineering design packages across multiple disciplines. This work ensures design readiness and alignment with construction sequencing as the project progresses.

Procurement and controlled deliveries

- Procurement of key materials and components will continue, with controlled deliveries of construction materials and equipment occurring throughout the month. Deliveries will be managed to align with the construction schedule and minimise impacts to surrounding areas.

ENGAGEMENT ACTIVITIES

Investing in local initiatives

Mudgee Show Society, Young Woman Event

24 January 2026

Vena Energy sponsored the Young Woman Zone 5 Final in Mudgee, helping build leadership skills and community connection for young women in regional NSW.

The event showcased regional talent, with two participants advancing to the State Final.

This support reflects Vena Energy's ongoing commitment to community wellbeing and resilient regional communities.

FEEDBACK

Vena Energy is committed to delivering world-class green energy solutions that better serve the interests of our stakeholders.

We invite you to get in touch if you have feedback or want to know more about the project.
